PROJECTS

Hack Portal (04/2021 - 10/2021)

- A software or a website that allows students to find team-mates to take part in various hackathons. It also allows different organizations to post about their hackathons to which students can register.

Booking Portal (05/2022 - 06/2022)

- A website or a portal that provides the audience with travel and accommodation services. It has been developed with the use of MERN Stack.

Samarth (01/2022 - 07/2022)

- Samarth aims to provide employment opportunities for people with different types of disabilities. Society has had a reluctance towards people with disabilities and has had reservations about them becoming self-sufficient parts of the community; this is what we aim to tackle with our project.

NoteZipper (05/2022 - 05/2022)

- Website which allows the users to create, update, store and delete the notes for personal use so that the users can keep a track on the activities or important schedules in their daily lives. It has been developed using MERN Stack and Material UI.

Memories (06/2022 - 07/2022)

- Memories is a Social Media website that is developed using MERN Stack so that people can post their memories of travelling to different places and can be viewed by other users. It includes features such as likes, search, update, create and comment.

WORK-EXPERIENCE

Frontend Web Developer Intern

Flekxa

02/2022 - 04/2022

Flekxa helps restaurants to go online and receive online food orders without paying third-party commission. With the help of the website the customers can order food with ease and make contributions to support local restaurants.

Task

- My task as a Frontend Web Engineer/Developer was to develop and maintain the website from the admin side and also add new features to provide a better user experience as well as building front-end components for the owner panel website. It included various technologies and frameworks like Bootstrap, Jinja, JavaScript, and much more.
